ROCÍO GIRARDINI

ABOUT ME

I am a Frontend programmer, I have a great passion for technology and I consider myself a proactive person focused on the quality and performance of my work. My experience in projects with ReactJS and Vue.js has allowed me to acquire skills in developing web applications and implementing effective solutions. I keep myself in constant learning and always look for new opportunities to grow as a professional and bring value in the projects in which I participate.

My curriculum is constantly being updated!
I invite you to see an always updated version at this **link**. Plus, you'll see my development skills in action.
